Chairman's Message

Dear CG clients

The Construction Guarantee (CG) was the first construction guarantee institution in Korea to support the independent economic activities of construction companies and lead the exemplary development of the construction industry. Since its introduction in 1963, CG has provided necessary guarantees and other financial services to the construction industry, thus helping its development.

Based on its solid financial structure and accumulated expertise, CG has grown into the largest specialized financial institution for construction in Korea. It has a capital of KRW 6.6 trillion, and a guarantee balance of KRW 166 trillion. CG is recognized internationally for its financial solvency, receiving international credit ratings of A for 13 consecutive years from Fitch, an international credit rating agency, A2 for six consecutive years from Moody's, and A+ for 11 consecutive years from A.M. Best.

Throughout the past global financial crisis and the COVID-19 liquidity crisis, CG stayed true to its original role as a financial supporter of the construction industry. It will continue to ensure the success of its members and the development of the construction industry through steady change and innovation, including promoting digital transformation and strengthening financial solvency in a rapidly changing management environment.

CG executives and employees will do their best to earn the trust of their clients through management strategies that ensure exemplary management and market leadership.

CG asks for your continued interest and support in the future.
Thank you.

CONSTRUCTION GUARANTEE

CG vows to do its best for the success of its members and the expansion of the construction industry by embracing continuous change and innovation.

Chairman of Construction Guarantee

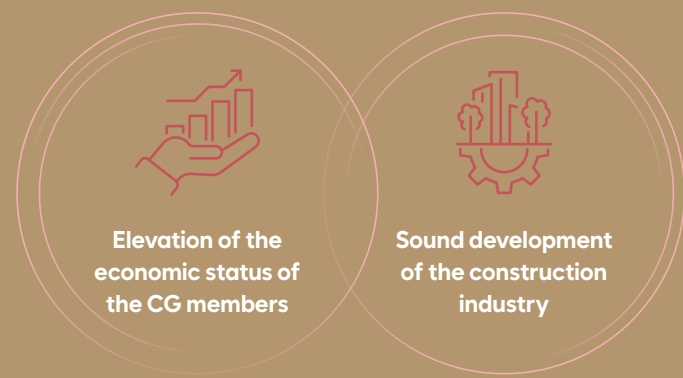

Lee Seokyong

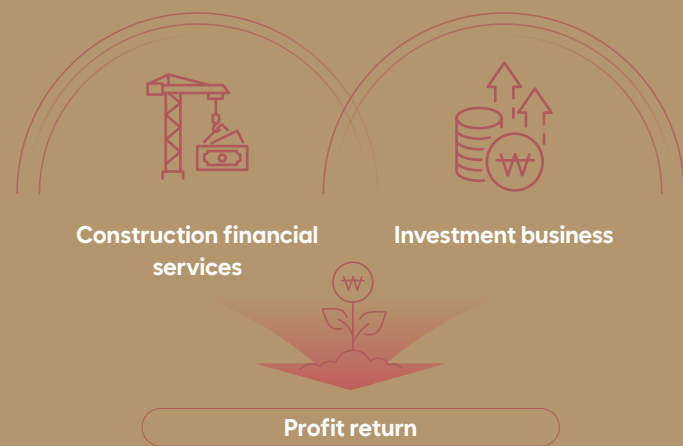

Purpose of Establishment and History

By providing a new path for the growth of the construction industry through the institutionalization of construction finance, CG helped the construction industry by improving the economic status of its members through various financial support for the past 62 years. CG is exerting continuous efforts to ensure the development of the construction industry and economic growth through improved reliability of construction contracts.

CG HIGHLIGHT

As of Dec. 31, 2024

The trust and passion of its members have been the most important foundation for CG, which was established in 1963 with a capital of KRW 200 million and 425 members. Its capital grew to KRW 6.5696 trillion, its membership increased to 13,254, and it achieved a guarantee balance of KRW 166 trillion.

Based on its solid financial structure and accumulated expertise that led to excellent international credit ratings, CG will continue to fulfill its role as a leader in construction finance.

DOMESTIC GUARANTEE

CG supports the contracts and the performance of construction contracts for its members by strengthening the credit of the construction industry and protecting contractors from risks. It contributes to the promotion of public welfare through stable guarantees.

Significance of CG Guarantee

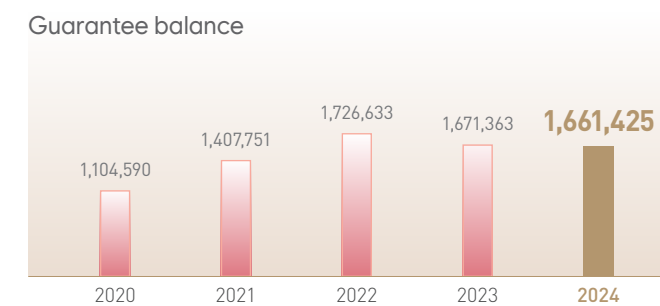

Types of Guarantee by Construction Progress

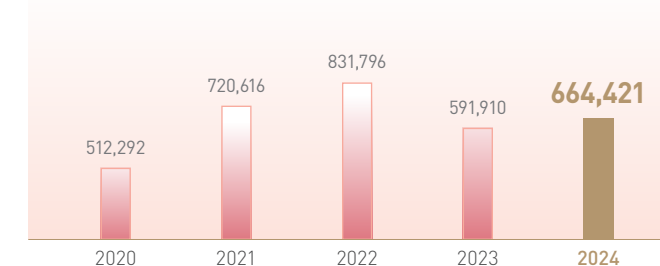

- Construction Order**
Bid bond If any member who successfully acquired the construction contract does not conclude the contract, then CG will pay the deposit to the project contractor.
* Land sale bid bond, agreement signing bond
- Construction Contract**
Contract bond If any member fails to fulfill any of the contractual obligations and the contract is cancelled, then CG will pay the deposit to project the contractor.
Performance bond If any member does not fulfill any of the contractual obligations, then CG will fulfill such obligations on behalf of the member or pay the deposit to the project contractor.
* Construction bond, project execution bond, agreement implementation bond
- Construction in Progress**
Advancement payment bond CG guarantees refund of the advance payment to the project contractor, that is received by any members under the terms of the contract, when any reason for a refund occurs.
Subcontract payment bond When the payment of the subcontract concluded by any CG member is not paid, then CG will pay the deposit to the subcontractor.
* Payment guarantee of construction machinery & equipment lease fee, advance payment bond for temporary electricity handling
- Construction Completion**
Maintenance bond CG guarantees any member's remuneration obligations with regards to any defects after the completion of construction work.
* Other guarantees: Lease deposit payment bond, etc.

Guarantee Trend

(Unit: KRW 100 million)

Guarantee record

Guarantee Limit

The limit is based on the member's number of shares.

The limit is based on the investment shares that do not rely on basic loans.

The limit is based on the member's construction capability.

OVERSEAS GUARANTEE

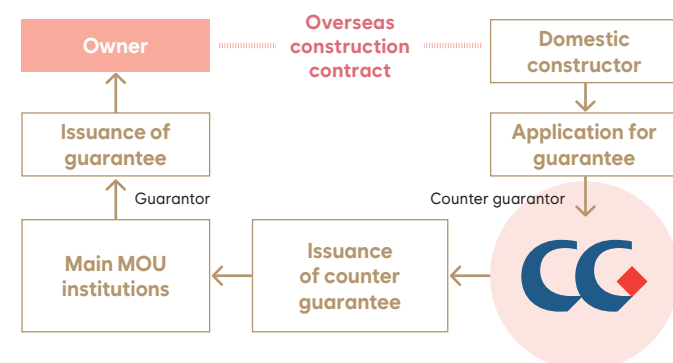

CG supports its members expanding into overseas markets by issuing internationally recognized guarantees that meet global standards. Guarantees are transmitted directly to project owners through international financial networks such as SWIFT (Society for Worldwide Interbank Financial Telecommunication).

* SWIFT: Society for Worldwide Interbank Financial Telecommunication

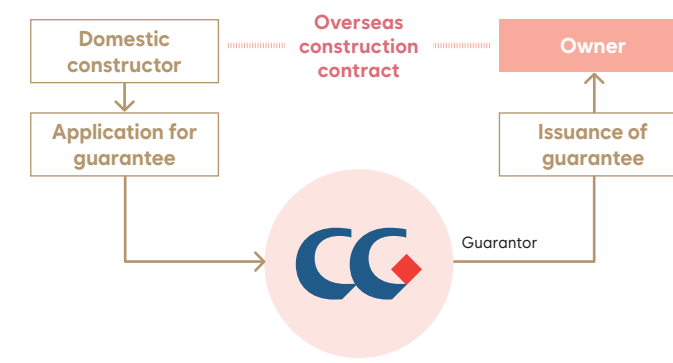

Overseas Guarantee

Indirect guarantees through domestic & overseas financial institutions

Direct guarantee for overseas contractors

2017.03 Issued the first direct guarantee to the Cambodian government for the Sala Ta Orn Dam Project

Since then, CG has provided numerous direct guarantees—including bid bonds, performance bonds, and advance payment bonds—for overseas clients in Cambodia, Laos, Vietnam, the Philippines, and other regions, particularly for projects funded by EDCF and ADB.

Guarantee Balance

International Credit Rating

To strengthen our global presence, CG has secured international credit ratings, qualifying us as a reliable provider of overseas guarantees and enabling members to reduce guarantee fees when working with foreign banks.

LOAN

CG provides funds necessary for construction business operations and construction projects at lower interest rates than other financial institutions, thus helping its members run their businesses smoothly and reduce financial costs.

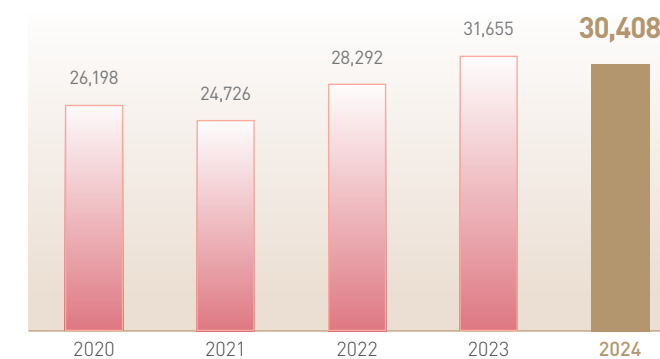

Overview

※ Execution limit standard: Execution of up to 60% of the amount calculated according to the above standard

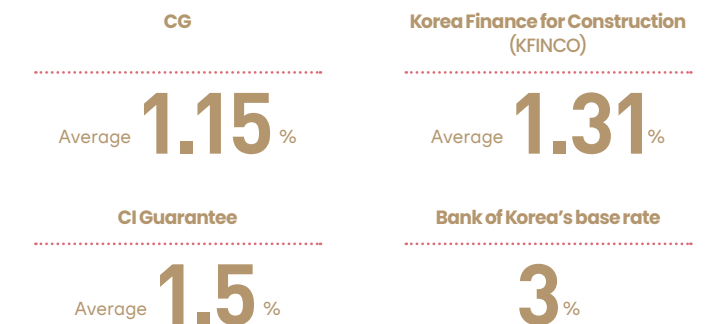

Changes in Loan Size

(Unit: KRW 100 million)

Basic Loan Interest Rates of CG vs. Other Financial Institutions

[As of Dec. 2024]

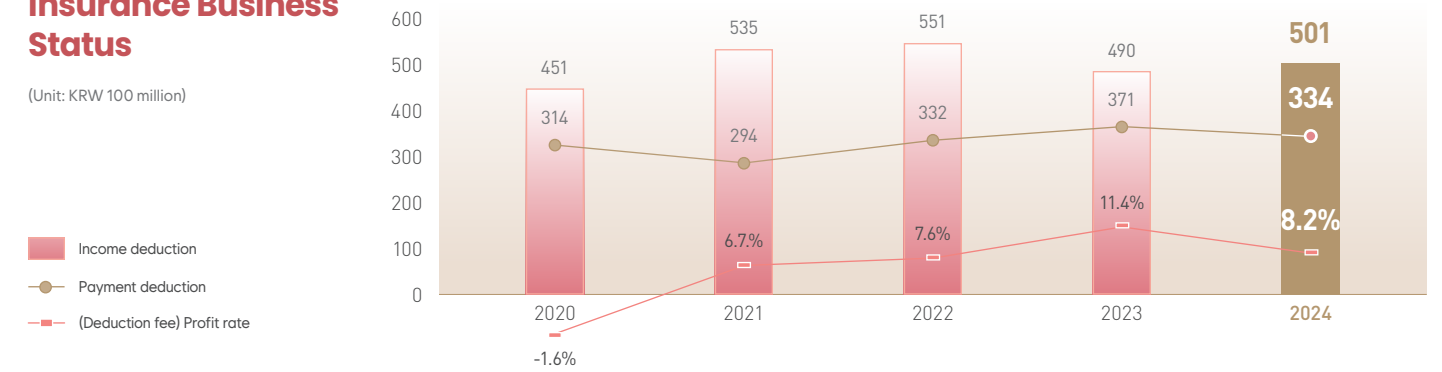

INSURANCE

CG addresses complaints and compensation requests in the event of an accident by paying for damages caused by worker accidents at construction sites, fire/collapse/typhoon/flood of objects, noise/dust complaints, etc., allowing CG members to focus solely on carrying out construction activities.

Insurance Business Status

(Unit: KRW 100 million)

Advantages and Competitiveness of Insurance Products

Cost reduction

- Low deduction fee based on low business expenses
- Offer terms and conditions favorable to the CG members compared to other non-life insurance companies

High coverage

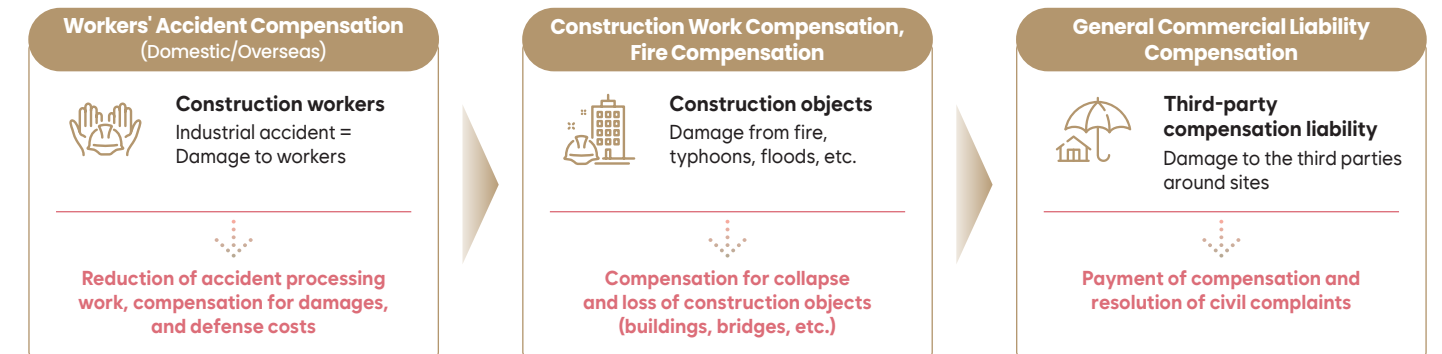

- Reasonable interpretation of terms and conditions and application of legal principles from the CG member's perspective
- Litigation agency for cumbersome civil complaints

Profit returns

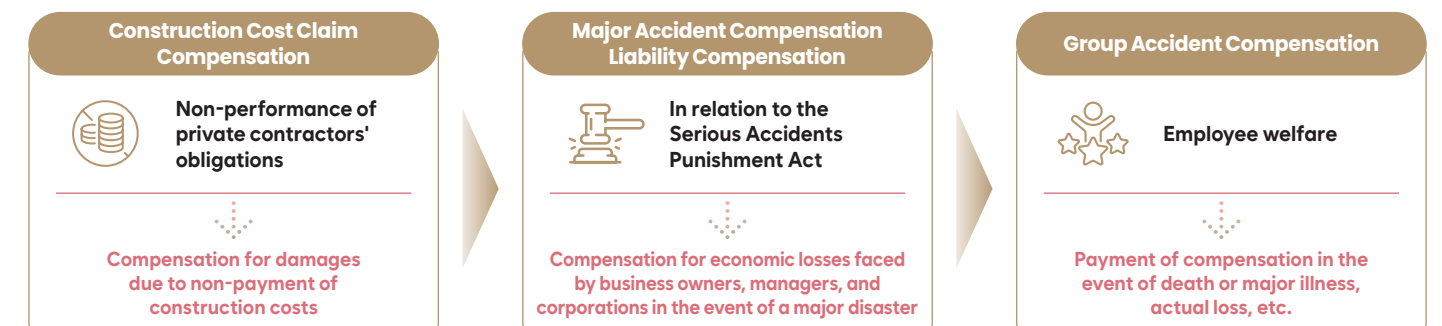

- Profits are accumulated as retained earnings, contributing to increased equity value

Insurance Products

On-site risks and insurance products

Risks in business operations and compensation products

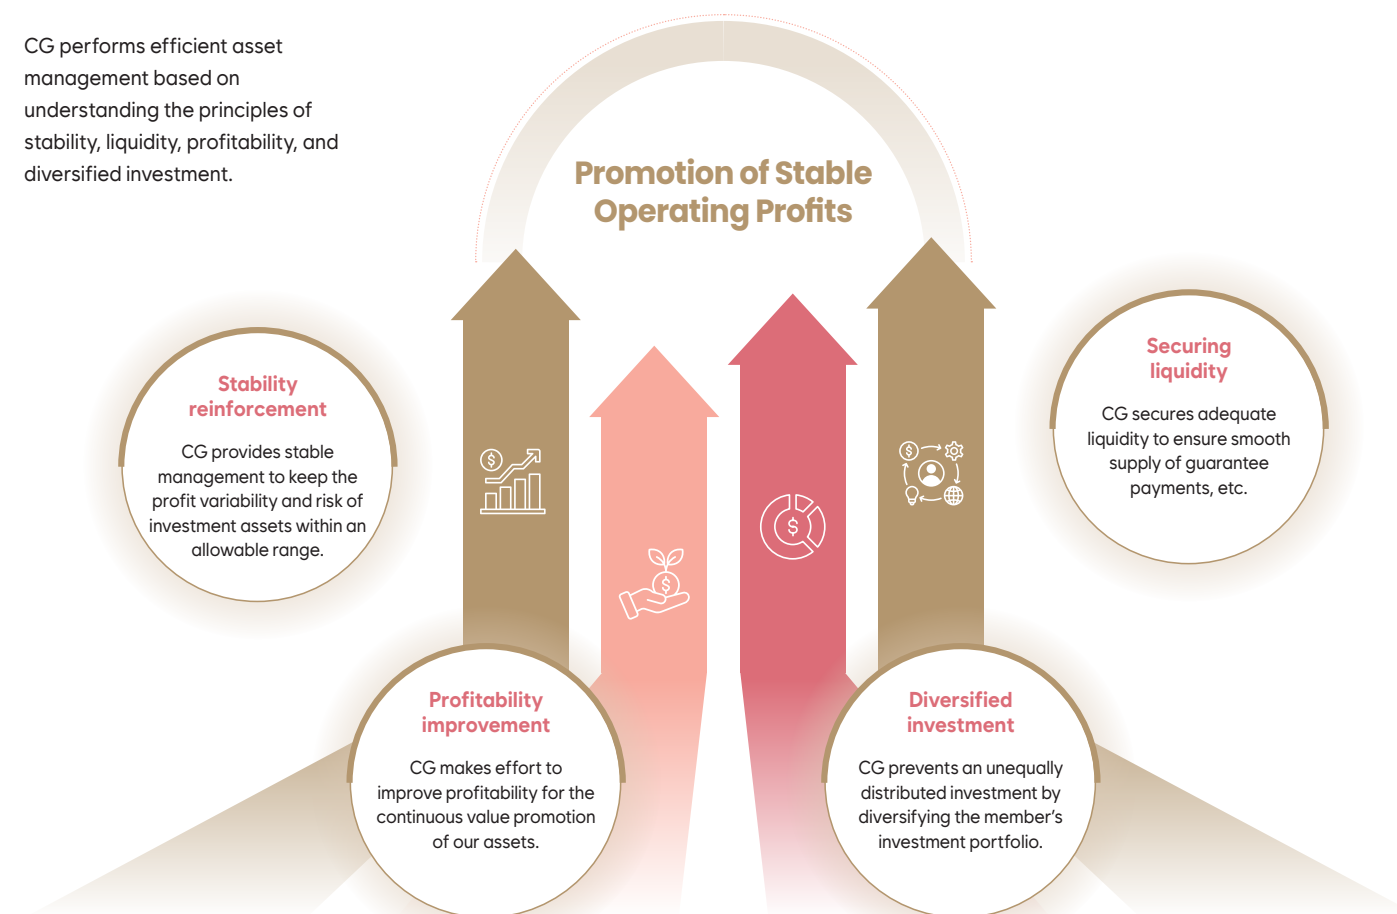

ASSET MANAGEMENT

CG promotes stable asset management to reduce risk and increase operating profits to protect the asset value of its members. Operating profits from surplus funds serve as a source of dividend and share value increases, or as a basis for providing low-cost financial services.

Principle of the Asset Management

CG performs efficient asset management based on understanding the principles of stability, liquidity, profitability, and diversified investment.

Asset Management Status

Asset Percentages (Unit: KRW 100 million / As Dec. 2023)

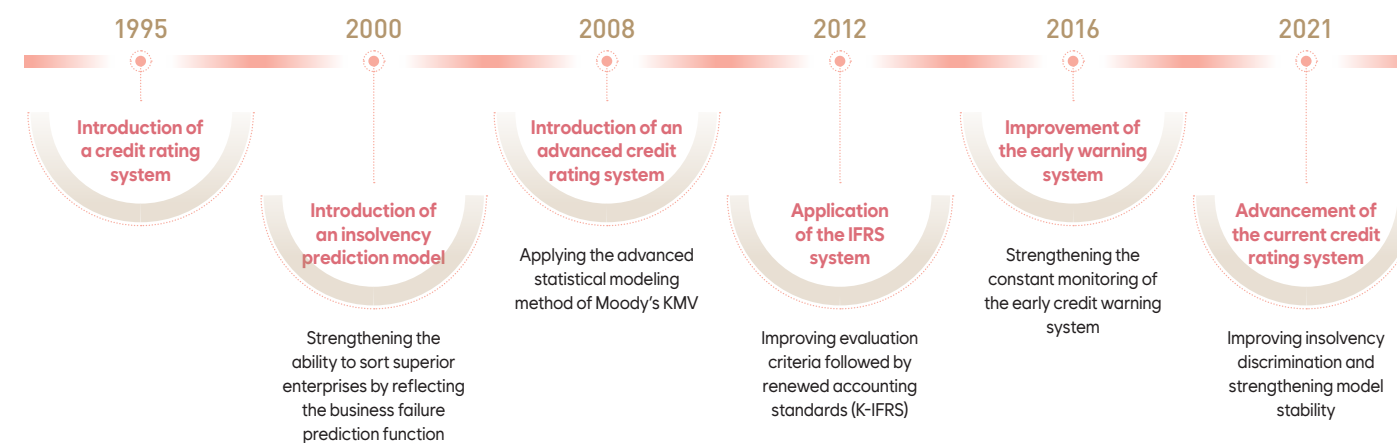

CREDIT RATING

CG was the first construction guarantee institution to introduce a credit rating system in 1995. Based on its accumulated expertise in ratings, CG has continuously developed a rating system that serves as the basis for reasonable transaction conditions. These include reflecting the latest rating trends of advanced financial institutions, such as default prediction models, through continuous inspection and improvement.

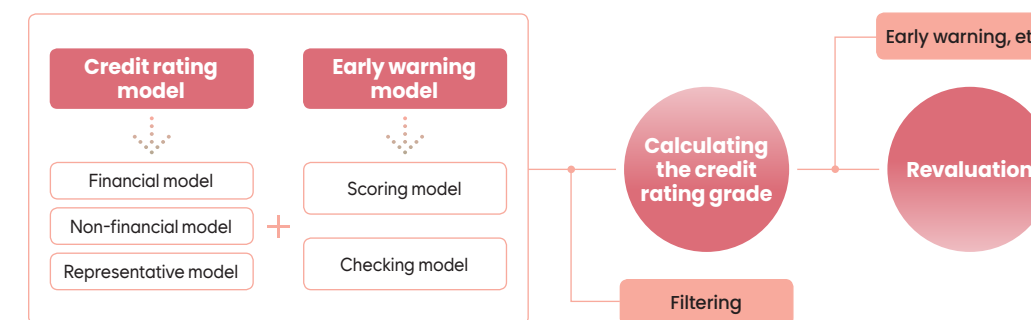

Development of Credit Rating System

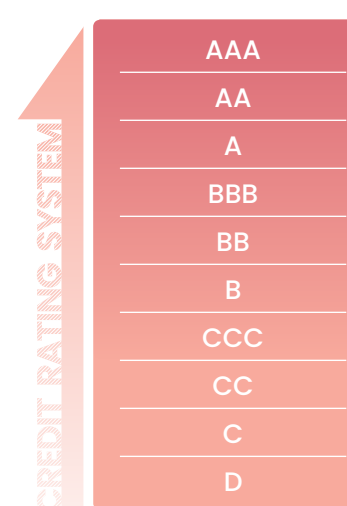

Credit Rating System

The credit rating system is used to comprehensively evaluate a member's ability to repay the debt by applying the member's financial status and pre-collected non-financial status (loan, business contracts, etc.) to the system based on the latest financial statements. After evaluation, the early credit warning model is used to carry out a revaluation if any insufficiency is found.

Credit Rating System

The CG credit rating consists of 10 grades.

Purpose of Credit Rating

The CG credit rating is used for guarantee limits, guarantee fees, interest rates, and guarantee reviews in business transactions with CG.

CLAIMS & RECOVERY

CG will lead the sound construction guarantee market by thoroughly preventing guarantee accidents and providing prompt and professional guarantee performance with its 60 years of expertise in bond management.

Prevention of Guarantee Accident

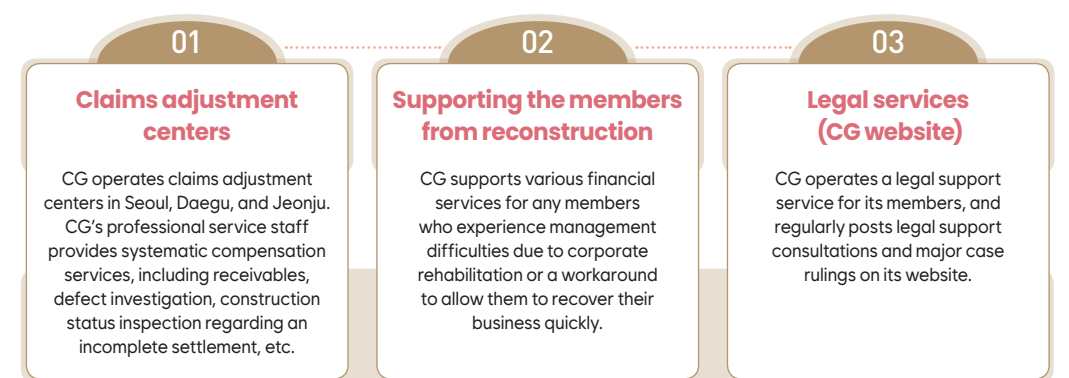

CG has been performing special management strategies to prevent any guarantee accidents related to guaranteed construction and guaranteed entrusted construction.

(As of Dec. 2024)

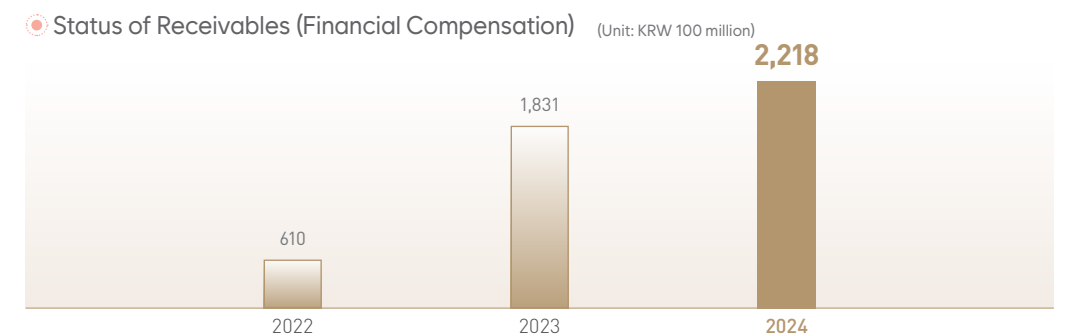

Customer Support

CG's claims adjustment centers and customer support service will assist you in dealing with complicated and strenuous disputes.

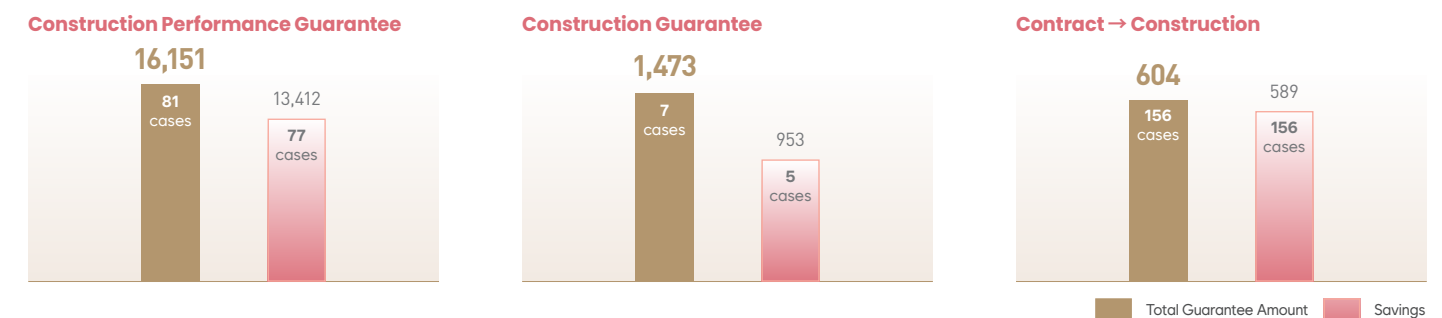

Guarantee Implementation

In the event of a guarantee accident, CG will do its best to protect the assets of the guarantee creditors and its members by providing prompt and professional compensation.

● Alternative construction (compensation for performance of service) and reduction in payment 2002 - 2024 (Unit: KRW 100 million)

DIVERSIFICATION & PUBLIC CONTRIBUTION

**Korean
Construction
Industry Goes
Higher and Further**

- 34 **CSM** (Customer Satisfaction Management)

CUSTOMER SATISFACTION MANAGEMENT

CG has established a systematic and client-oriented service by adding sincerity to the system, making it easy for clients to succeed. It ensures customer satisfaction and is moving toward the development of the construction industry.

Customer Information Protection

Every year, CG renews the Information Security Management Systems (ISMS) certification which verifies the stability and reliability of the information network system to authorize its stability in protection of customer information.

CG appoints Chief Information Security Officer (CISO) who has expertise in information security and information technology to manage customer information protection.

Our clients' personal information is strictly protected based on legal standards. A multi-staged internal control system thoroughly blocks any possibility of leaking client information from the institution.

Protection of Surety Creditors, etc.

CG has fulfilled its guarantee responsibility even during many turbulent times, including the IMF crisis, and promises to continue to do so in the future.

Protection of contractors

CG provides quick and accurate compensation services by deploying three compensation centers and professional personnel nationwide.

Protection of subcontractors, etc.

CG protects subcontractors, etc. at construction sites through subcontract payment guarantees, construction equipment rental payment guarantees, etc.

Protection of citizens, etc.

CG protects ordinary citizens around construction sites through business compensation liability guarantees, construction work guarantees, etc.

Assistance in the construction of social infrastructure

CG guarantees all stages of the construction process so that public and private construction projects around us are carried out well, thereby impacting your life.

"CG is with you on the road, and GTX construction is around us."

Customer Value Enhancement

CG holds various cultural and artistic events throughout the year to increase the value and utilization of the construction center, and further impresses its clients.
